Television audiences in the United States and Jamaica are measured by distinct systems that influence everything from advertising budgets to programming strategy. While the United States relies on the Nielsen ratings framework, Jamaica uses a locally adapted model that incorporates both traditional viewership and emerging streaming metrics. Understanding these differences is essential for any content creator, marketer, or broadcaster looking to navigate both markets efficiently. Ratings serve as the currency of broadcast television, indicating how many households or individuals are watching a program at a given time. In the U.S., the Nielsen system has long dominated, using a combination of set-top boxes, diaries, and recent advancements in digital tracking to estimate audience size and demographic breakdowns. The U.S. rating is typically expressed as a percentage of all households with a television, while the demographic rating focuses on specific age and income brackets that advertisers. Jamaica, by contrast, has
