When the 13 colonies were first charted, maps were hand-drawn and largely qualitative. The boundaries reflected political agreements, not precise measurements. Today, those same boundaries are digitised at high resolution, allowing analysts to superimpose layers such as the 18th-century census, soil types, or timber production zones. This fusion uncovers patterns—for instance, a correlation between early iron ore deposits and the locations of major colonial forts, or the way rivers guided settlement
